THAI MAI QUANG

Da Nang, Viet Nam | 0857176357 | thaiquangqt2003@gmail.com | Github

OBJECTIVE

Software Engineering Intern with experience in full-stack development, specializing in backend technologies like Node.js. Passionate about building scalable systems and eager to learn from real-world projects.

EDUCATION

Duy Tan University   Da Nang, Viet Nam

Bachelor of software engineering   *Aug. 2021 – Present*

EXPERIENCE

CNPT Company (Intern backend developer)   Da Nang, Viet Nam

NodeJS Training Program   *Feb. 2025 – Mar. 2025*

- Developer and maintained RESTful APIs using node.js and Express.js for real estate management.
- Collaborated with the team to design and optimize database schemas using MySQL.
- Gained hands-on experience in Agile workflows, version control with Git, and writing clean, scalable code.

PROJECT

Book store API | *Typescript, Nest.js, MySQL, Swagger, Docker* | Github

- Build an online bookstore management system with book management, order, shopping cart functions and payment integration Zalopay.
- RESTful API design using Nest.js, combined with Docker for deployment and development environment management.
- Integration Swagger to automate API documentation, making it easy to interact and test.

Chat app | *Typescript, NodeJS, Soket.io, ReactJS, MongoDB, TailwindCSS, Zustand, DaysiUI* | Github

- Developed a real-time chat app using ReactJS, NodeJS, Socket.io and MongoDB, with TailwindCSS and DaysiUI for response ui.
- Implement user authentication, real-time messaging, and image upload using cloudinary.
- Utilized Zustand for state management and Typescript for type-safe development.
